ADVANCED BATTERY CONCEPTS

Advanced Battery Concepts is focused on providing the energy storage solutions we all need for a clean future.

Since our founding, Advanced Battery Concepts has addressed how to accelerate the adoption of clean energy solutions with better batteries. We recognized that any energy storage technology must be economically responsible, socially responsible, and environmentally responsible to truly change the way energy is stored. And that's exactly what our advanced bipolar battery technology achieves.

Over the last decade, we have re-engineered how batteries are designed and manufactured. The result is the most affordable energy solution that can be implemented across the globe. Our technology is protected with a broad intellectual property portfolio of over 55 patents and 40 trades secrets in every key country.

Our advanced bipolar batteries use common materials that are cost-effective, safe and available. More importantly, we have designed the system to be easily disassembled at the end-of-service life in order to recover and reuse key components and active materials over and over again.

Our core technology developments are now complete. We are rapidly commercializing energy solutions across the globe in multiple markets. With our licensing partners, we are deploying this technology in traditional motive and stationary applications. At ABC, we are installing energy storage solutions for residential and commercial systems providing stored electricity at costs 40% lower than any other available battery solution.

WHAT WE DO

Advanced Battery Concepts produced both Home, Commercial and Utility energy storage systems. Our Energy Storage Solutions are simply the most responsible energy storage system available today and are based on our revolutionary EverGreenSeal™ Technology which ensures better batteries and a better world.

OUR RESPONSIBILITY TO OUR CUSTOMERS... PRODUCTS, TECHNOLOGY AND SERVICES THAT ARE:

- **ECONOMICALLY RESPONSIBLE**
- **SOCIALLY RESPONSIBLE**
- **ENVIRONMENTALLY RESPONSIBLE**
